-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract contains less than 50 words.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kentaro (JP 02-293229).

Kentaro discloses all the claimed features of the invention including:

- a method (Figs. 1, 2) for determining a head position (eye position of a driver, eye being part of a driver's head) of a driver (6) of a vehicle (vehicle, Fig. 1), the vehicle comprising at least one rearview mirror (1), the method comprising:

- detecting (via 18, 19) an inclination angle (Purpose, lines 2-3) of the at least one rearview mirror in a coordinate system (x, y, z) comprising horizontal (y, x) and vertical components (z);

- calculating a range of the head position of the vehicle driver on the basis of the inclination angle (25 calculates positions of eyes in 3-D range, Constitution, lines 11-14, each position depends on angle of rearview mirror, Purpose, lines 1-4).

Allowable Subject Matter

3. Claims 2-23 are allowed.

Reasons For Allowance

4. The combination or method as claimed wherein calculating, on the basis of the first horizontal (or vertical) angle, a first horizontal (or vertical) angle range of the

Art Unit: 2863

head position with respect to the left rearview mirror and calculating, on the basis of the second horizontal (or vertical) angle, a second horizontal (vertical) angle range of the head position with respect to the right rearview mirror (claims 2, 11, 13, 22) is not disclosed, suggested, or made obvious by the prior art of record.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brandin (US 5,694,259) discloses an apparatus for calculating a first horizontal (or vertical) angle (A), and second horizontal (or vertical) angle (B) (Fig. 1). However, the calculations of angles in Brandin are in response to the position of the driver's head (Abstract, lines 6-8) and not vice versa.
